September/Week 1 - October/Week 8																																														
<b>Similarity and Trigonometry</b>																																														
November/Week 9 - December/Week 14																																														
<b>Congruence and Constructions</b>																																														
December/Week 15 - February/Week 22																																														
<b>Connecting Algebra and Geometry through Coordinates</b>																																														
February/Week 23 - March/Week 29																																														
<b>Circles With and Without Coordinates</b>																																														
April/Week 30 - May/Week 35																																														
<b>Extending to Three Dimensions</b>																																														
May/Week 36 - June/Week 39																																														
<b>Applications with Probability</b>																																														
June/Week 40 - June/Week 42																																														
<b>Proofs</b>
